30 - 40 min.

GUESS THE OBJECT

OBJECTIVE: The student will develop their oral directions skill.

MATERIALS NEEDED:

1. Paper and pencil.

PROCEDURE:

1. Have each class member draw an object as you give an oral description. The object should be simple like a toothbrush, a glass of water, a baseball, etc. The class draws it as you give the description.
2. Don't identify the object being described by name until the students have a chance to guess what it is and share their pictures with class members.
3. After a few students have given an oral description, place the class in teams of two and have them finish the activity by giving a description to each other.
