

KYLE HANSEN

I am very fortunate to have worked in education for over 30 years. In that time, I was able to work with some of the greatest people ever! I love working with people and assisting them with whatever their needs are. I started teaching in 1989. My first four years was in South Summit School District. I taught 3rd grade and coached the high school wrestling team. After that, I taught 5th grade at Heartland Elementary School. Throughout my career I worked with amazing administrators who mentored me well in best practices in the classroom. These great administrators helped me learn the fundamentals of administration. My first principal-ship was at Ridgecrest Elementary. I was fortunate to then open Foothills Elementary. After Foothills, I joined the HR team. Human Resources was a great career experience for me as I learned about the critical work that happens at the district level. I also enjoyed working with the secondary school level while in HR. My two final school assignments were Eastlake Elementary and then, I was fortunate enough to open Golden Fields Elementary. I truly loved every career assignment I had.

Working in the schools as a substitute administrator has been a wonderful experience. It feels good to see and be with amazing people!
