

## **Richard Price**

### **Administrative Experience: Secondary level**

I have worked in education for 30 years and have had many great experiences with students of all backgrounds. My first experience as a certified teacher was working with students in a juvenile correctional facility in Granite School District. From there, I became an administrator at Valley High Alternative School in Jordan School District. Working with students who did not feel they fit into the mainstream school system was very rewarding as we solved problems and sought success. The balance of my educational tenure was serving at Bingham, Herriman, and Copper Hills High Schools. As we help all students reach their full potential and find pathways that interest them along the way, we help to create young adults with a clear sense of what they can accomplish.

Education should be the highest priority of our young people as they learn, grow, and develop. As educators, we provide a safe environment for students to achieve their goals and reach their potential. We create a school culture that fosters student development in academics, arts, athletics, activities, and achievements. Each student who enters our school will have a wide range of opportunities reflecting their personal interests. Working together as educators, parents, and students, we help kids forge through their educational growth and create successful outcomes.
